

EXOTIC ANIMAL DAY

Hosted by Charter Township of Shelby,
Burgess-Shadbush Nature Center, and
Shelby Township Parks and Rec

**Saturday, March 7, 2020
11:30 A.M. and 2:30 P.M.**

**Burgess-Shadbush Nature Center
4101 River Bends Dr., Shelby Township, MI 48317**

The program includes smaller animals such as small lizards, snakes and other friendly critters as well as larger species that not frequently seen up close. A nocturnal animal presentation is included. Throughout the day, you can “meet and greet” some crazy new friends, ask questions, and learn the dos and don’ts of exotic pet ownership.

Noted naturalist and educator Randy Baker from Naturalist Endeavors and local nocturnal animal specialist Amanda Felk from the Night Nature Alliance will be the guest presenters for this program. They will be bringing in some exciting new native and nonnative animals that you definitely wouldn’t regularly see at our nature center. Cameras are always welcome, but please refrain from flash photography when requested. The approximate program length is 75-90 minutes. Space is limited, so pre-register today.
